

TOP NOTCH PERFORMANCE!

A productive, reliable, heavy-duty, hydraulic 90° corner notcher for all of your notching needs. It'll shear mild steel and stainless steel at high production speeds and is simple to operate. The operating controls are laid out for straightforward, easy access. A generous work table and sheet supports with tee slots allow the operator to maneuver large sheets.

The dual head design incorporates an edge notching feature which increases the versatility of the machine. Notch a corner, cope a side, these notchers do it all. Tee slots in the table make adjustment of the angle gauges and side gauges a snap.
